

NIAN SHOU DIGITAL

Building thoughtful software by solving real problems

Chris Mason
Founder
Nian Shou Digital

WHY WE EXIST

Every product begins with a genuine problem

Rather than starting with technology or business ideas, we begin by understanding real-world challenges and designing software that genuinely improves the way people work and live

Our philosophy is simple: Solve the problem first. Build the software second.

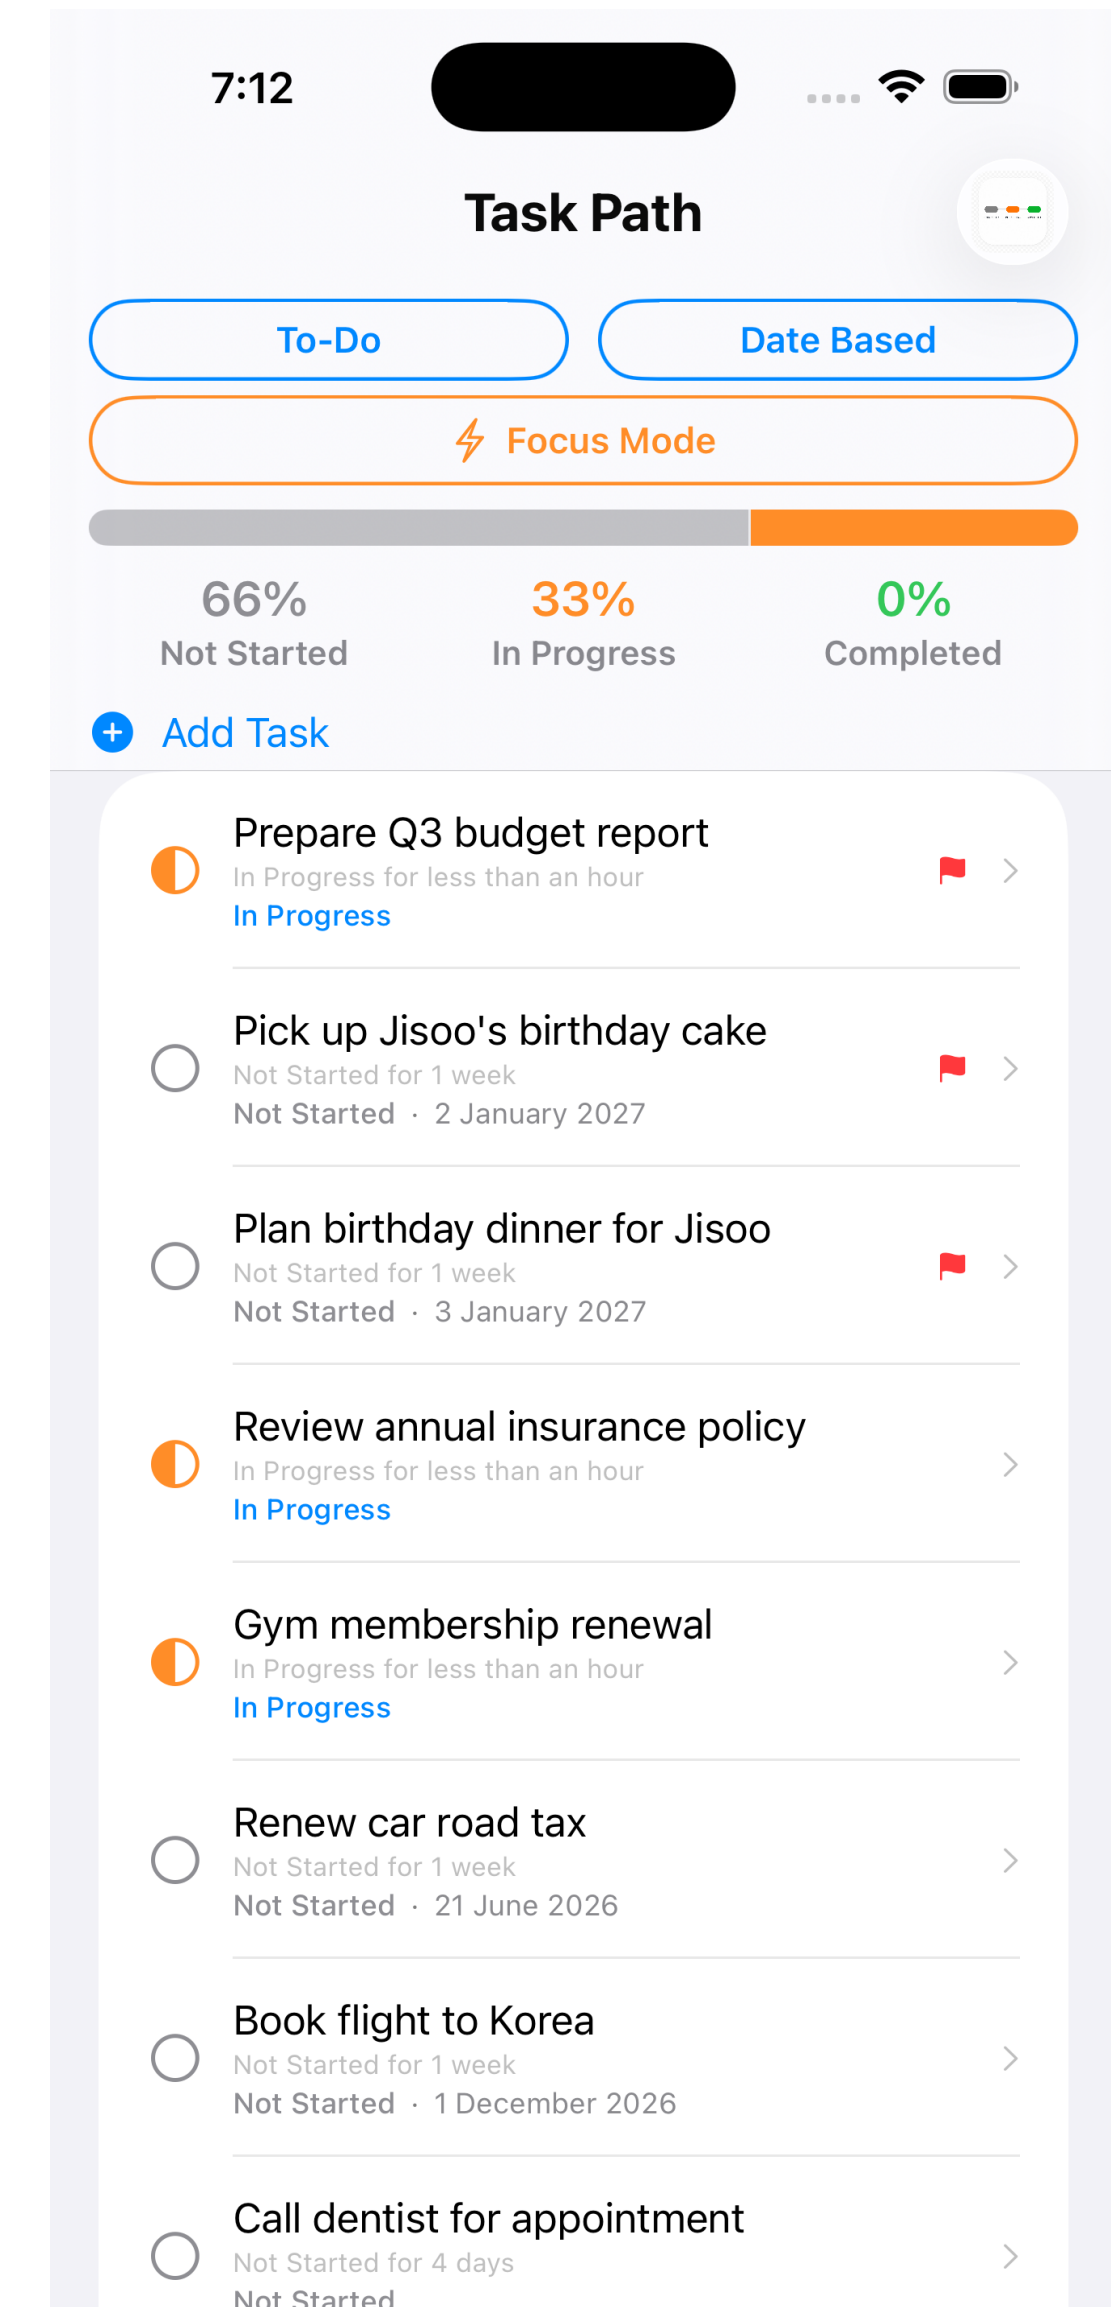

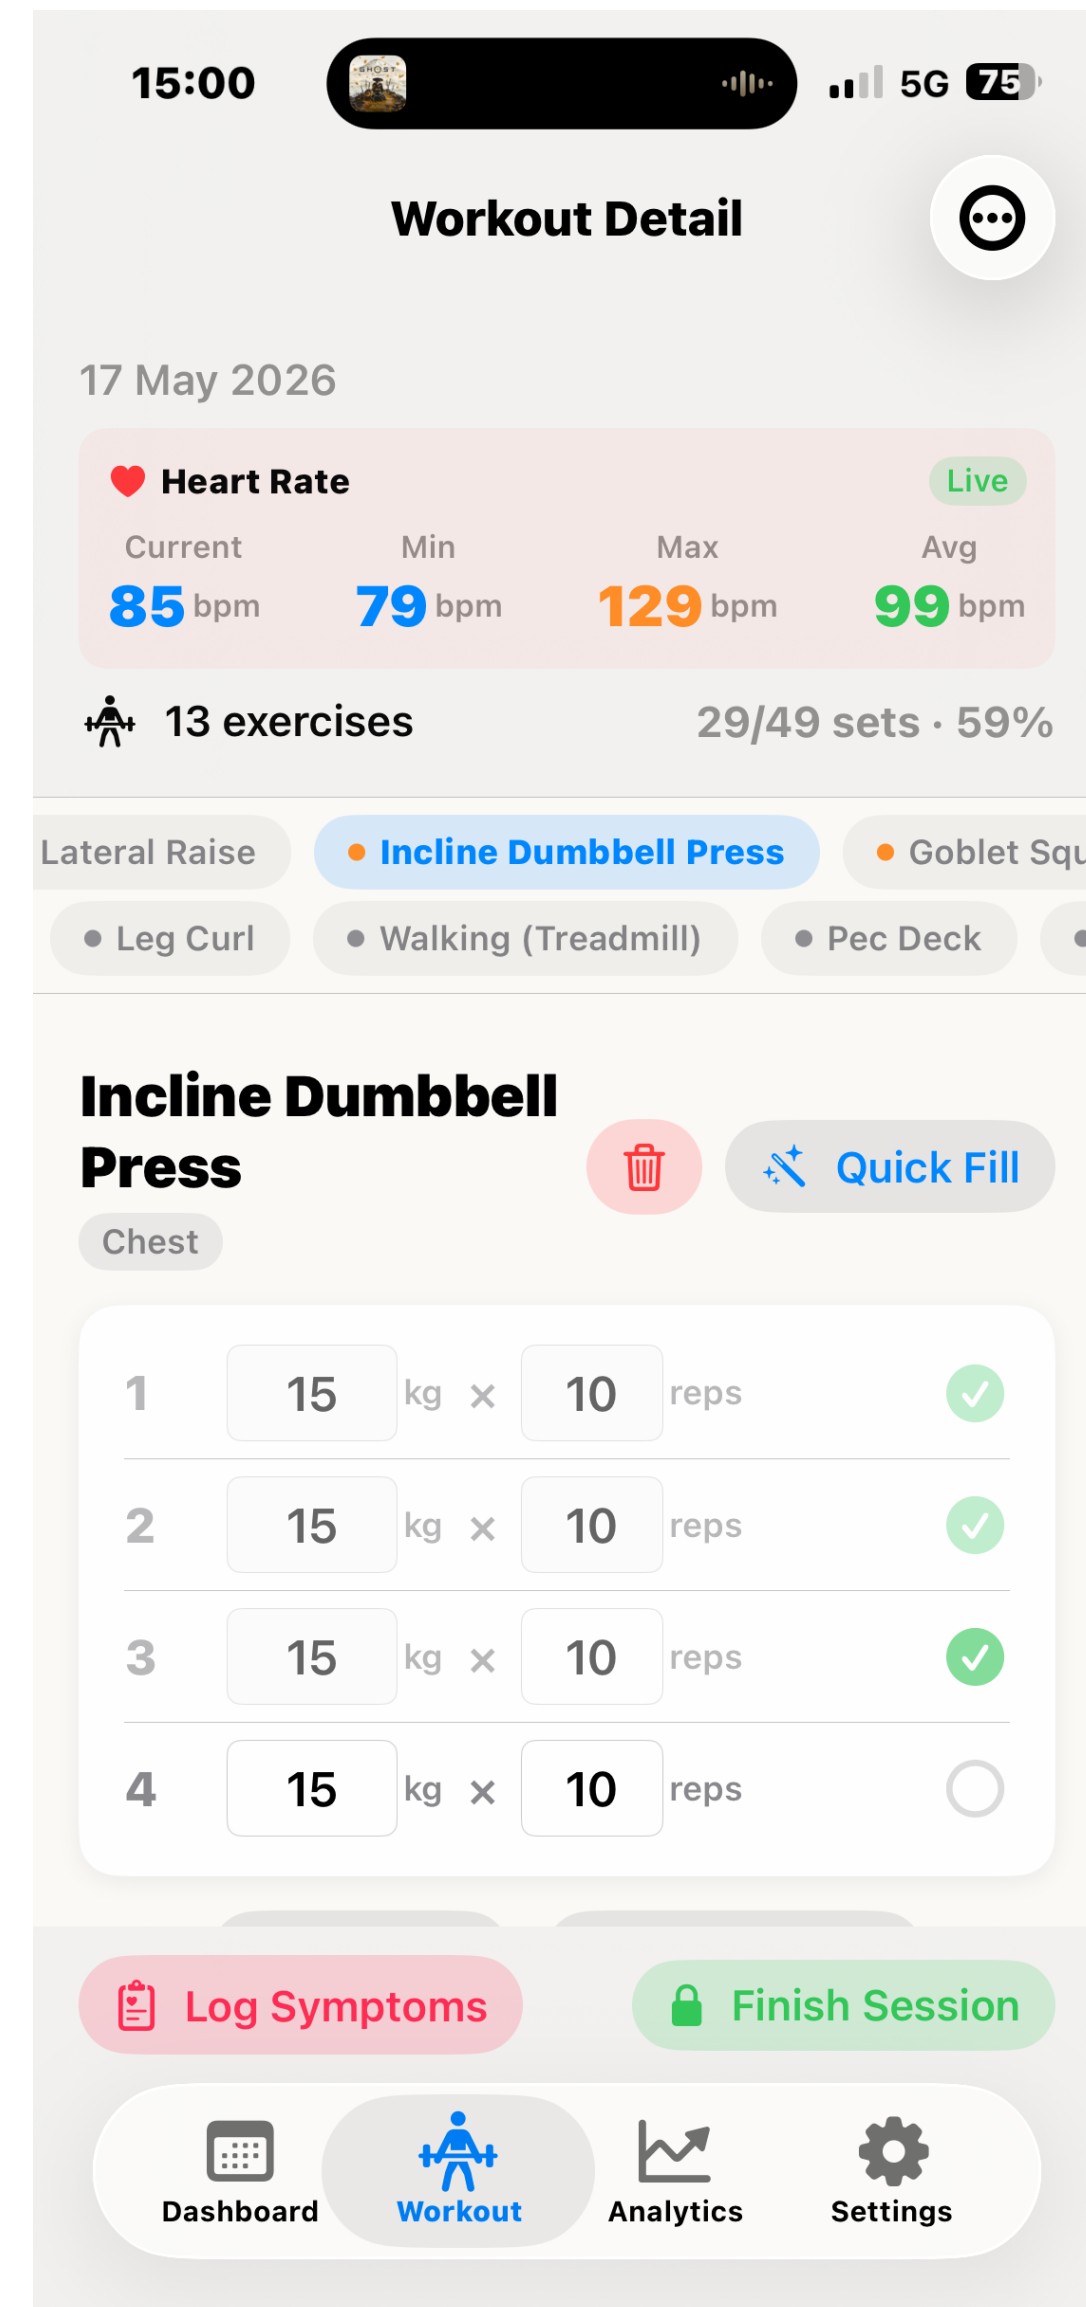

FROM PROBLEMS TO PRODUCT

Our products weren't planned as a portfolio.

Each began as an individual solution to a genuine problem.

As more products were developed, a common pattern emerged—a disciplined approach to discovering opportunities, designing solutions and delivering software.

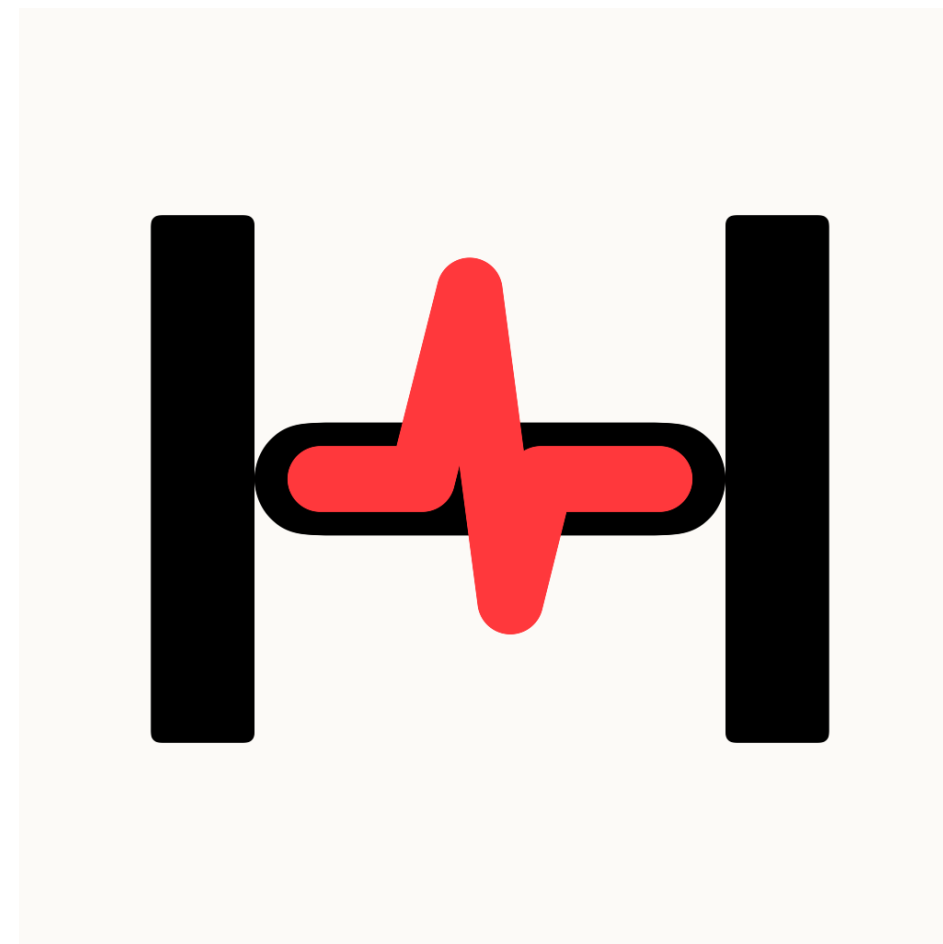

That process ultimately became the foundation of Nian Shou Digital

PRODUCT PORTFOLIO

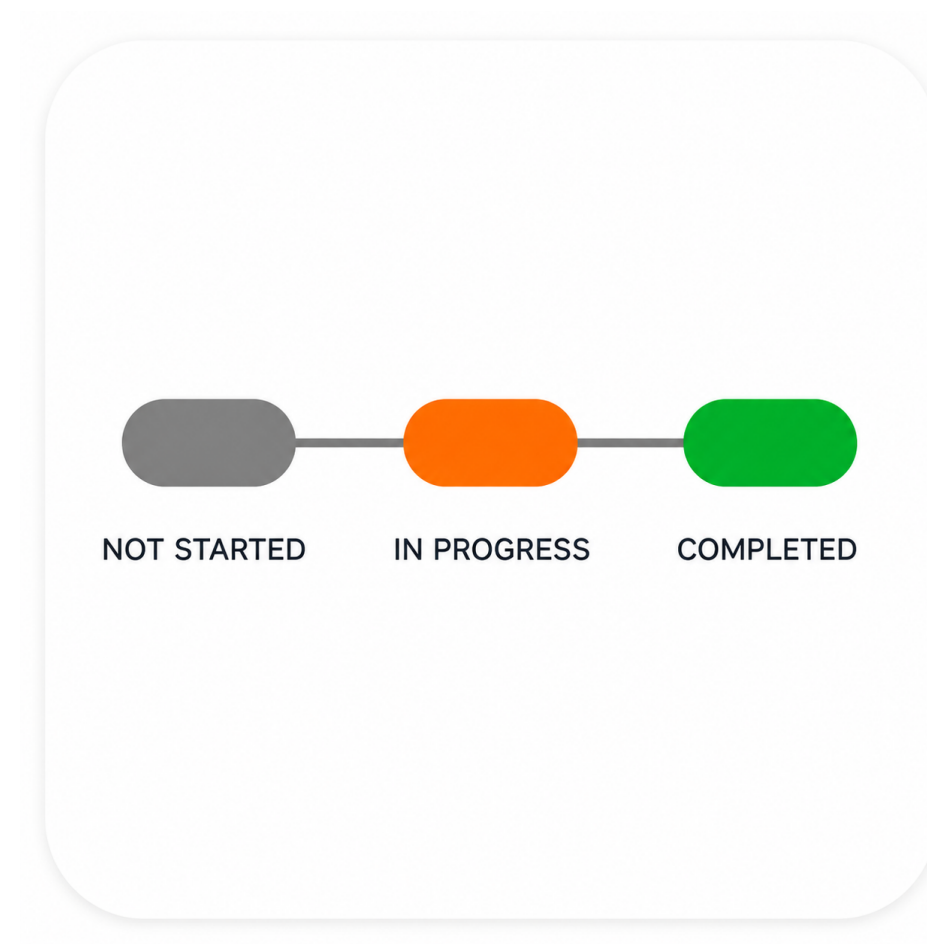

Four products. One philosophy. One operating system

LiftPulse

Intelligent workout tracking for healthy and safe strength training

TaskPath

A focus-driven task manager that helps people make meaningful progress

Roadmap

Strategic planning software designed for solo software businesses

MoneyDance Import Assistant

A utility that simplifies importing financial data into MoneyDance

5

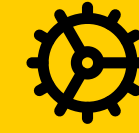

THE NIAN SHOU DIGITAL OPERATING SYSTEM

Every product follows the same disciplined process from idea to customer

Ideas

Every product starts by solving a genuine problem

Engineering

Develop with disciplined AI-assisted workflows

Discovery

Validate the opportunity before writing code

Marketing

Launch, learn and improve through user feedback

Product Design

Define the product before building it

Learning

Every product improves both the portfolio and the operating system itself

Every product improves both the portfolio and the operating system that supports it

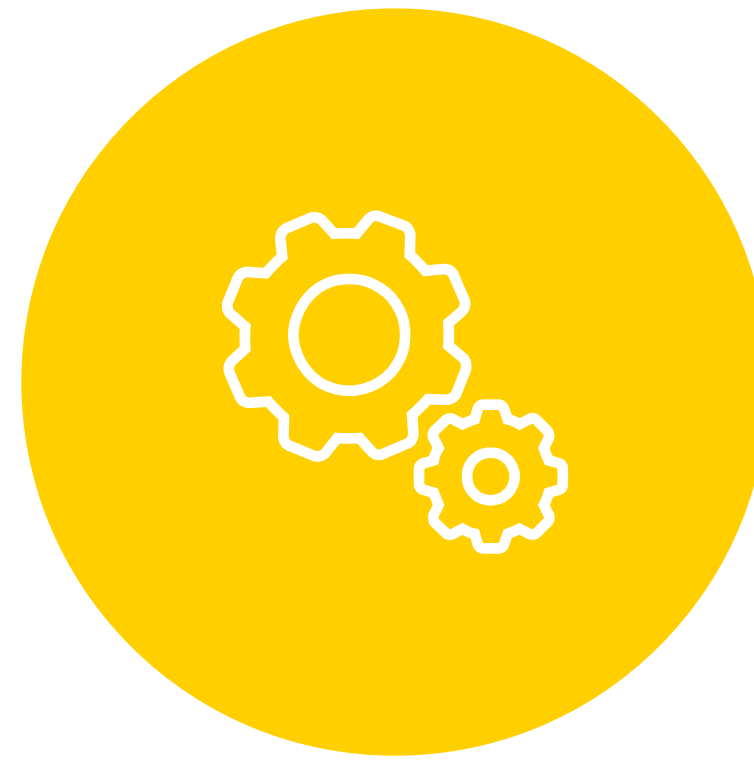

OUR PRINCIPLES

Our principles guide every product we build and every decision we make

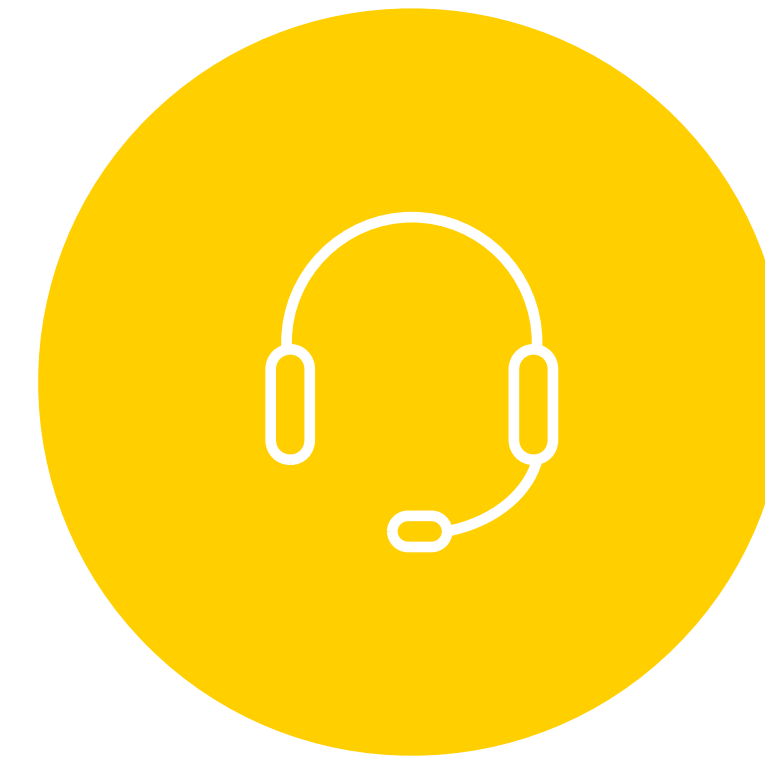

Build for Real Problems

Technology follows the problem - not the other way around

Design Before Coding

Understanding comes before implementation

Learn Continuously

Every release improves both the product and the company

WHAT MAKES NIAN SHOU DIGITAL DIFFERENT?

Disciplined Product Development

Every product follows a repeatable operating system rather than an ad hoc process

Disciplined AI-assisted Engineering

Modern AI tools accelerate development while disciplined engineering maintains quality

Continuous Improvement

Products will evolve through learning, customer feedback and ongoing refinement

Long-term Thinking

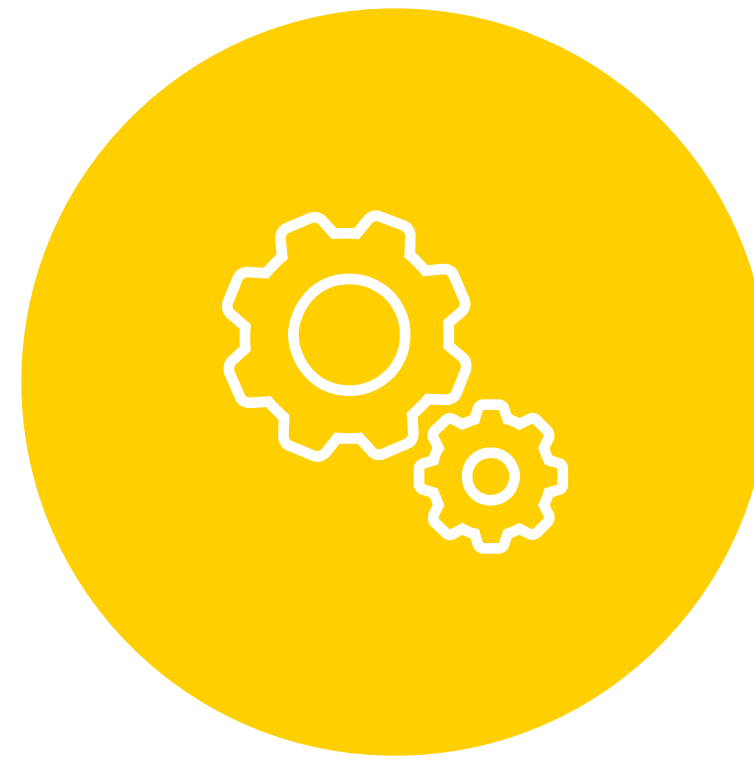

The goal is to build a sustainable portfolio of products rather than individual applications

OUR VISION

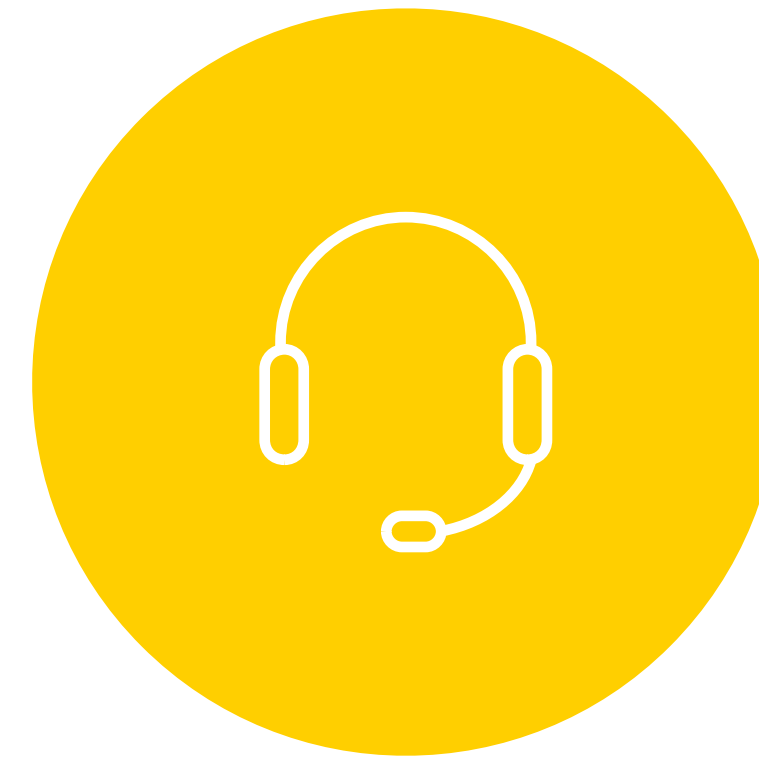

Build Products People Genuinely Value

Focus on solving meaningful problems
with thoughtful software

Build a Sustainable Company

Create a profitable business that can
continue investing in quality software

Keep Learning

Strengthen both the portfolio and the
operating system with every product
that we create

We believe that great software companies are built through disciplined learning, continuous improvement and a relentless focus on solving real problems

QUESTIONS & DISCUSSION

I'D VALUE YOUR THOUGHTS ON WHERE I SHOULD FOCUS NEXT

THANK YOU

HOW I GOT HERE

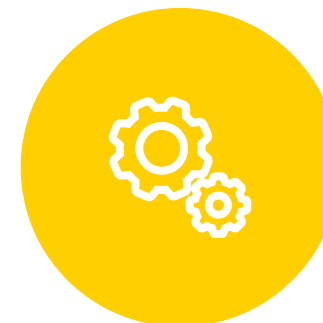

An accidental transition from retirement to entrepreneurship

RETIREMENT

31-YEAR CAREER IN IT

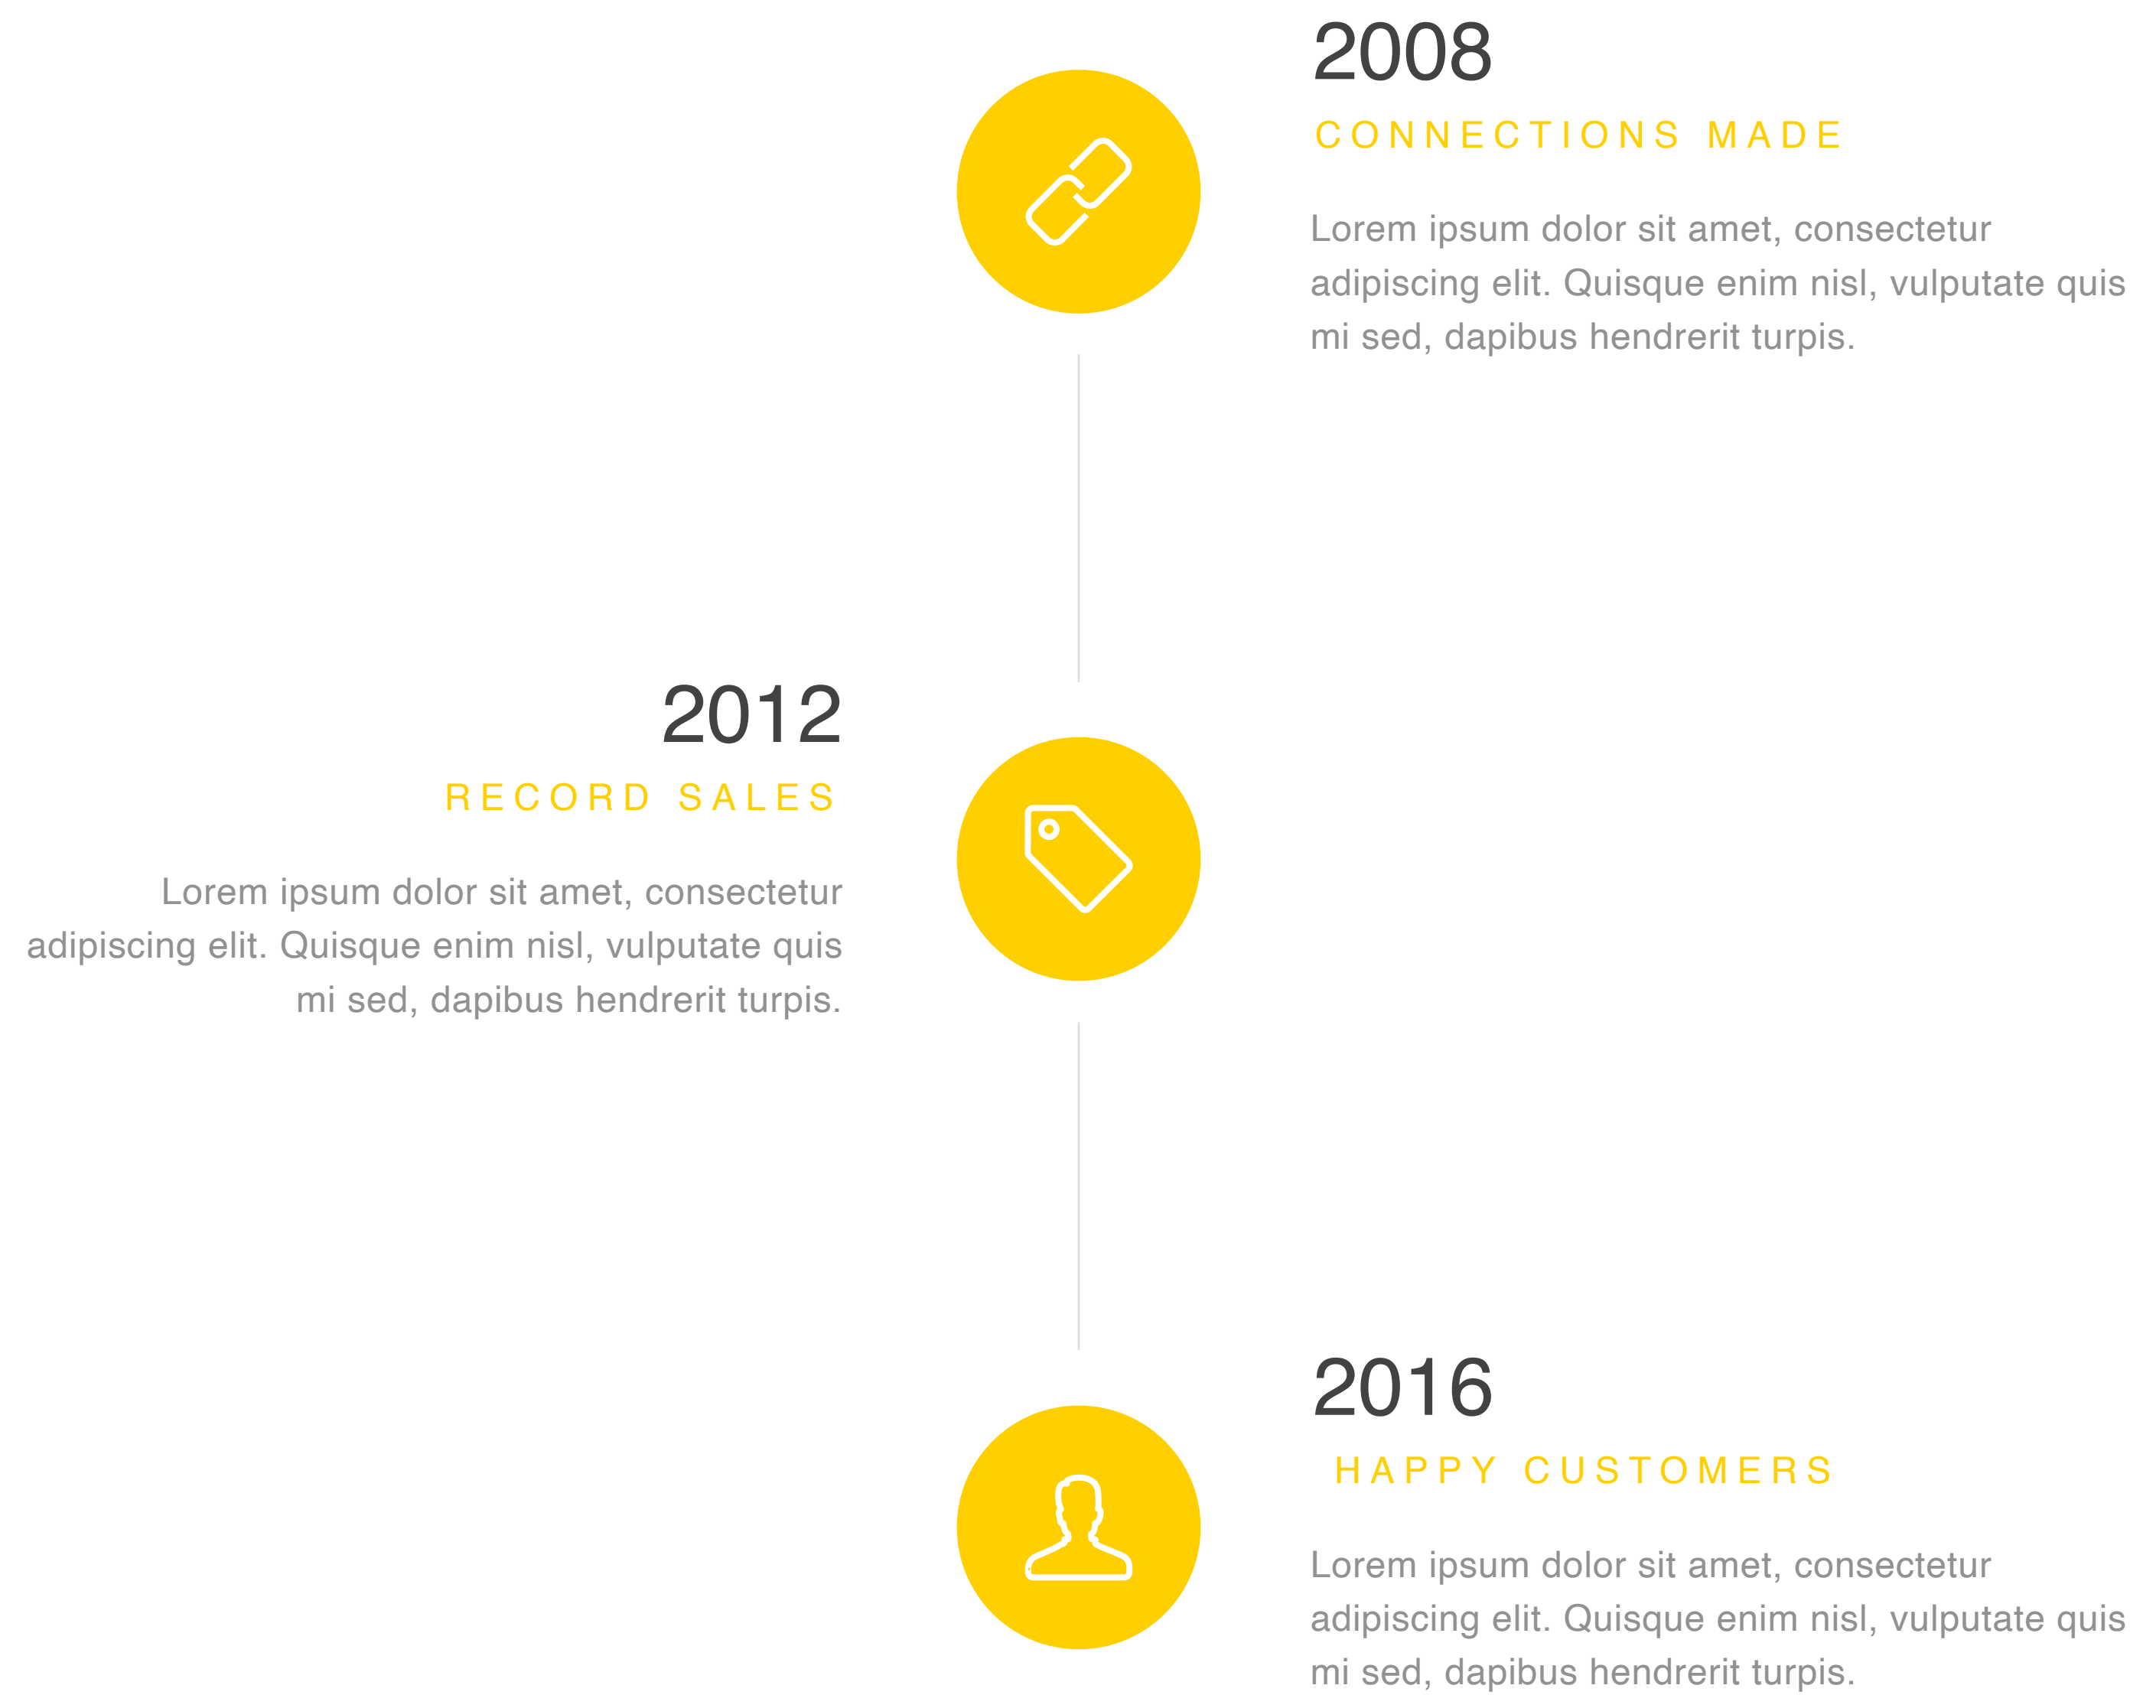

After 31 years in IT project management, delivering complex technology programmes, I retired expecting to slow down - but instead found myself needing a new challenge

ENTREPRENEURSHIP

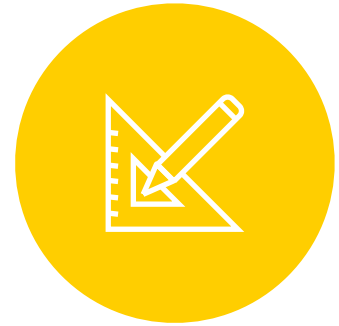

A NEW DIRECTION

I started building software simply to solve problems I faced myself. Only later did I realize those products could become the foundation of the business

DESIGN CONCEPT

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Creative Design

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque enim nisl, vulputate quis mi sed, dapibus hendrerit turpis.
